

First Episode of Psychosis

□ Listen to this The OBHAW team is committed to helping every individual heal. We are passionate about providing services that meet you where you're at.

Because of this passion, we recently began providing services for young adults between the ages of 15 and 24 who are experiencing their first symptoms of psychosis. Our program uses a mixture of individual, weekly counseling, education, supportive services, and medication management to help young adults reach their personal goals.

How do I enroll in this program (or enroll a loved one)?

In order to enroll in this program, you must be between the ages of 15 and 24 and have been experiencing psychotic symptoms for between 1 week and 2 years.

You should also have a diagnosis of one of the following:

- Schizophrenia
- Schizoaffective Disorder
- Schizophreniform Disorder
- Delusional Disorder
- Brief Psychotic Disorder

It is easy to enroll. To get in contact with our First Episode of Psychosis (FEP) Therapist, simply fill out the contact form on the right side of this page. They will follow up with you soon.

What if I (or a loved one) am experiencing symptoms, but don't have a

diagnosis?

We want to help. You can either contact our FEP Therapist by using the contact form on the right side of this page to get more information or call our offices anytime.

OBHAW Walk-In Clinics are also a convenient and quick way to get into care. For more information about our Walk-In Clinics click [here](#).
