Outpatient Opioid Treatment Program

If you or someone you love is suffering from an opiate addiction and cannot stop using heroin or painkillers, a opioid treatment program may be the best route to recovery. We at Ouachita Behavioral Health and Wellness know how difficult the decision to begin a life of recovery can be. Engaging in treatment requires strength, courage and willingness to change.

On your first visit a licensed therapist will meet with you to determine if our Opioid Program is best for you. If accepted to the program, the doctor will begin you on an individualized medication regimen. You will also have access to the following services while in the program:

- Random Urine Drug Screens
- Lab Work (may include Hepatitis C testing & HIV testing)
- Pregnancy Testing
- Random medication counts
- Group Therapy Sessions
- Individual Therapy Sessions
- Psychiatric and Personality Evaluations
- Access to in house pharmacy

We assist in the transition between a life of chemical dependency and mental illness, into a life of healing and recovery in a supportive and compassionate way.

WE ACCEPT ALL INSURANCES
