

# Psychological Tests

Psychological tests are formalized measures of mental functioning. Most are objective and quantifiable; however, certain projective tests may involve some level of subjective interpretation. Also known as inventories, measurements, questionnaires, and scales, psychological tests are administered in a variety of settings, including preschools, primary and secondary schools, colleges and universities, hospitals, outpatient healthcare settings, and social agencies. They come in a variety of formats, including written, verbal, and computer administered.

At Ouachita Behavioral Health and Wellness, we are able to provide the following psychological tests:

Autism

ADHD

Depression

Anxiety

IQ (Ages 4-100)

Achievement (Pre-K – Adult)

Speech/Language

Visual Motor

Auditory Perception

Behavioral Assessment

Vineland (for Intellectually Deficient)

Personality Assessment (Diagnostic clarification/assist with treatment)
